PROFILE

Third-year CTIS student at Bilkent University (CGPA **3.93/4.00**, full scholarship), currently on **Erasmus+ at FH Oberösterreich** (Austria). Focused on **full-stack web, mobile (React Native & Kotlin) and QA / test automation**, with internships in **QA at Commencis** (Hungarian digital banking project - OTP Bank) and **React Native at Akbank**, plus Java and Node.js/React projects.

EDUCATION

İhsan Doğramacı Bilkent University, Ankara | **B.S. Information Systems and Technologies (CTIS)** **Class of 2028**
CGPA: 3.93/4.00 - **Full Scholarship** - Coursework: DSA; Software Engineering; OOP Analysis & Design; DBMS; Software V&V & Testing; Backend & Frontend Web Technologies

FH Oberösterreich (University of Applied Sciences), Austria | **Erasmus+ Exchange Semester** **Sep 2026 - Feb 2027**
Relevant Coursework: Mobile App Development; Semester Project; AI in Creativity; Data and Information Security; Foundations of CS; OOP with Python; German

Metropolia University of Applied Sciences, Helsinki | **ICT Summer School** **Aug 2025**

Darüşşafaka High School, Istanbul | **Valedictorian (Ranked 1st)** **Sep 2020 - Jun 2024**
GPA: 97.03/100 - Ranked **1755th** (Top 0.05%) in the national university entrance exam (YKS) - IELTS Academic: 7.0

SKILLS

Programming: Java, JavaScript, TypeScript, C, Python
Testing & QA: Playwright, Postman, Charles Proxy, JIRA, XRAY, Manual Testing, Test Case Design, Black-box & White-box
Backend & Frontend: Node.js (Express.js), REST APIs, JDBC, React, React Native, HTML5, CSS3, Tailwind CSS, EJS
Databases & Tools: Oracle SQL, MySQL, Git, Docker, Linux, Maven, Flyway

EXPERIENCE

Akbank, Ankara, Hybrid | **React Native Intern** **Sep 2026**
- Joined the **Payment Systems Technologies** team in Akbank Mobile, working with a mentor on the team's **mobile workflow**.
- Took part in **sprint planning** meetings and **Azure DevOps** planning; reviewed code with my mentor to learn **code review** practices.
- Strengthened **TypeScript** foundations and began building **React Native** skills through independent demo projects.

Commencis, Hybrid | **QA Engineering Intern** **Jul 2026 – Aug 2026**
- Supported QA efforts on a **European digital banking project (OTP Bank)**: **API testing with Postman**, **network traffic inspection with Charles Proxy**, **WCAG 2.2 Level A Accessibility Testing** and defect tracking & test management via **JIRA/XRAY**.
- Completed onboarding across QA domains including accessibility testing (WCAG) and non-functional testing standards.

Commencis, Remote | **Software Testing Trainee** **Mar 2026 – Apr 2026**
- Selected for a 6-week Software Testing Camp covering **SDLC** test processes, **black-box/white-box** techniques, continuous reporting, and **non-functional testing** (performance, security).
- Gained hands-on exposure to **test automation frameworks** and **CI/CD** integration with industry professionals.

İhsan Doğramacı Bilkent University, Ankara | **Undergraduate Teaching Assistant** **Oct 2025 – May 2026**
- Assisted and mentored **30+ students** in Introduction to Programming with C (CTIS 151) labs and instructed **20+ students** in Data Structures & Algorithms (CTIS 152) labs, strengthening my teaching and communication skills.

PROJECT WORK

- **Market Waste Reduction System – UYGUN Markets (2026):** Multi-user full-stack web app built with a **team of 4** (Node.js, Express.js, MySQL, JavaScript, EJS) for markets and customers. Designed **role-based routes** for public, consumer and market users (product listing, dashboard management, cart, profile). Used **Dockerized MySQL**, **RESTful** design & **session-based authentication**. Tested authentication, product listing, cart and dashboard flows with **Postman and Playwright**.
- **AROS Loot Shop (2025):** Designed a **UML class diagram** and implemented an in-game loot shop in **Java** and **Swing** using OOP principles, collections and modular design. Applied **MVC** to separate game logic, UI and input handling. Collaborated with a team using **Git/GitHub**.
- **Simple TODO App (2025):** CRUD backend in **Java and JDBC** with **H2**; **DAO layer** separating business logic from persistence, manual SQL queries.
- **Personal Portfolio Website (2025):** Responsive **Next.js, React and Tailwind CSS** site deployed on **Vercel** with a custom domain; SEO basics, Git workflow.
- **AI-Based Garbage Detection (2023):** Classified garbage containers (empty/dirty) with **YOLOv3 and OpenCV** on custom datasets. **Ranked 2nd among 50+ high schools** at the 30th Dr. İbrahim Arıkan MEF High School AI Competition.
