

Osman Yiğit Uygun

Ankara, Türkiye | +90 546 474 2978 | oyigituygun.com | [LinkedIn](#) | [GitHub](#) | osmanuygun197@gmail.com

Skills

Programming Languages: Java, JavaScript, C, Python
Frontend: React, JavaScript, HTML5, CSS3, Tailwind CSS, EJS
Backend: Node.js (Express.js), REST APIs, JDBC API
Testing & QA: Postman, Manual Testing, Test Case Design, Black-box & White-box Testing
Databases: Oracle Database, MySQL
Tools: Git, Docker, Linux, Maven, Flyway

Education

İhsan Doğramacı Bilkent University, Ankara Class of 2028
B.S., Information Systems and Technologies, CGPA: 3.90/4.00, 100% Scholarship

- Software Engineering focused - Coursework:** Data Structures & Algorithms; Principles & Methodologies of Software Engineering; Object Oriented Programming, Analysis and Design; DBMS; Linux Fundamentals; Computer Networks; Backend and Frontend Development

Metropolia University of Applied Sciences, Helsinki Aug 2025 - Aug 2025
ICT Summer School

- Coursework:** Understanding Game Backend; Introduction to Machine Learning
- Completed all courses, broadening my technical perspective in backend of software development, design processes, and machine learning.

Darüşşafaka High School, Istanbul Sept 2020 - June 2024
Valedictorian in High School, GPA: 97.03/100

- Valedictorian (Ranked 1st).** Ranked **1755th (Top 0.05%)** in the Turkish National University Entrance Exam (YKS) | IELTS Academic Band Score: 7.0

Experience

Commencis, Remote Mar 2026 - Present
Software Testing Trainee

- Selected for a 6-week **Software Testing Camp** focused on **SDLC**-based test processes, **black-box** and **white-box** testing techniques, **continuous reporting**, and **non-functional testing** including performance and security.
- Developing hands-on experience in **test automation** frameworks and **CI/CD** integration in collaborative sessions with industry professionals.

Google AI & Technology Academy, Remote Dec 2025 - Present
AI Trainee

- Selected as a scholar in the Yapay Zeka ve Teknoloji Akademisi - AI Track, an 8-month program covering **LLMs**, **FastAPI**, **version control** systems, and **software project management**, including P2P learning sessions, bootcamps and hackathons.

İhsan Doğramacı Bilkent University, Ankara Oct 2025 - Present
Undergraduate Teaching Assistant

- Assisted **30+** students during lab sessions for **Introduction to Programming with C (CTIS 151)** in Fall semester.
- Instructing **20+** students during lab sessions for **Data Structures & Algorithms (CTIS 152)** in Spring semester, strengthening my foundation in programming, teaching and communication skills through hands-on teaching experience.

Project Work

- Market Waste Reduction System - UYGUN Markets (2026):** Developed a multi-user full-stack web application with a team of 4 people for markets and customers using **Node.js**, **Express.js**, **MySQL**, **JavaScript**, **HTML/CSS** and **EJS**. Designed role-based routes for public, consumer and market users, including product listing, dashboard product management, cart operations, and profile workflows. Structured the project with separated routes, database/config files, environment variables, and **Docker-based** MySQL setup. Followed **RESTful API** design principles and implemented **session-based** user authentication. **Tested** RESTful routes and user workflows using **Postman**, including authentication, product listing, cart operations and market dashboard scenarios.
- AROS Loot Shop (2025):** Designed a **UML class diagram** and implemented an in-game loot shop system using **Java** and **Swing**, applying **OOP** principles, **collections**, and modular design. Followed **MVC-based architecture** to separate game logic, user interface, and user input. Collaborated in a team environment using **Git/GitHub**.
- Simple TODO App (2025):** Implemented a CRUD-based backend TODO application using **Java** and **JDBC API** with a file-based **H2 database**. Implemented persistent storage and manual **SQL** queries through a simple **DAO layer**.
- Personal Portfolio Website (2025):** Built a responsive portfolio website using **JavaScript** with **Next.js**, **React** and **Tailwind CSS**. Deployed on **Vercel** with custom domain. Applied component-based architecture, SEO basics and Git-based version control.
- AI-Based Garbage Detection (2023):** Developed an AI-based program to classify garbage containers as empty or dirty using **YOLOv3** and **OpenCV**. Created custom datasets (manual + Kaggle). **Ranked 2nd** among 50+ high schools in 30th Dr. İbrahim Arıkan MEF High School AI Competition.

Certification and Achievement

- Amazon University Engagement Program 2025 – SDE Track – Frontend, Backend, DevOps
- HackerRank Java Certificate
- CCNA: Introduction to Networks
- Foundations of Project Management - Google Careers (Coursera)
